

Devonian Fossil Gorge, U.S. Army Corps of Engineers

Project Description:

A system of educational stone kiosks, overlooks or discovery points, and accessible walkways was created to preserve and interpret the geological phenomenon uncovered near the Coralville Dam. Shoemaker & Haaland provided design for the following features on this project.

Design Features:

- Structural design for support of central water table and polished stone
- Design assistance and recommendations for all site elements
- Generated CAD drawings for wave pattern on stone exhibit wall
